MAHI

About MAHI

At MAHI, we're turning years of pioneering ocean crossings into real-world autonomy for vessels of every size. Joining MAHI means helping make maritime operations safer, smarter and more sustainable.

We build maritime autonomy for surface vessels. Our hardware enabled software pairs the MAHI Sense marine grade edge computer with the MAHI Remote Operations Center to deliver situational awareness, remote supervision and collision avoiding local path planning that works even without connectivity. Founded in 2022 and based in Mechelen, Flanders, MAHI grew out of Project Mahi (started in 2015), the team behind Mahi-2, the first autonomous solar vessel to cross the Atlantic in 2021–2022. Today our systems are integrated on new builds and retrofits from 6 to 60 meters.

Your role

You're a student worker, open to work on mutually agreed times. You'll support the build, assembly and quality control of our systems. You're hands-on, organized and committed to keeping our production flow smooth, safe and efficient. You will work across assembly tasks, hardware preparation, testing activities and packaging, ensuring that every unit leaving our facility meets our standards. If you enjoy blending practical work, teamwork and technical curiosity, this role will feel like home.

What you will do

As a Production Associate, you will take ownership of tasks such as:

- Assembling components and subsystems according to defined procedures
- Preparing hardware, cabling and system modules for integration
- Performing functional tests and basic troubleshooting
- Maintaining production documentation and reporting deviations
- Manage inventory workflow organization
- Ensuring a clean and safe workspace

Your profile

- Eye for detail and consistent quality
- Hands-on skills or interest in mechanical assembly, soldering and wiring
- Proactive and organized
- Professional proficiency in either English or Dutch

- Willingness to work on-site in Mechelen

Bonus:

- Interest in maritime technology
- Experience with Odoo

What we offer

- A hands-on role in a cutting-edge marine tech startup
- Real responsibility and clear impact on product delivery
- A tight-knit team with supportive colleagues
- Opportunities to learn, develop and broaden your technical skills
- Flexible mindset, variety in tasks and space to grow with the company

Ready to join us?

If you're excited to learn in a high tech startup by assembling high-quality systems and enjoy practical, meaningful work, we'd love to hear from you. Please submit your application through the form on our website and help shape the future of ocean innovation.

Thanks for considering MAHI as your next adventure on the water!
